Instructions:

To make your own Dwarven Battle Dice using these stickers and some 16mm dice:

1) Carefully cut out one strip.

2) Carefully cut the strip in half along the dashed line.

3) Peel off the backing from the left side of the sticker and carefully apply it to three sides of the dice by centering the first symbol on one face and gently wrapping the strip around the dice onto the other two sides. Using your thumb nail, firmly smooth down the sticker, especially on the edges of the dice.

4) Apply the other side of your sticker onto the other three sides of the dice, paying attention to the stone pattern on the sticker. That pattern is a seamless pattern, running perfectly around the dice if applied properly as shown below: This sheet had been designed so that two will fit on one letter sized piece of label paper.
